

But the other thing that the terrorist doesn't understand was how strong our—the strength of America. They didn't understand that. And the strength of America is our citizens: citizens who love each other; citizens who are decent; citizens who, when called upon, can respond to any adversity.

And that's exactly what's happening here on the White House lawn today. People from all walks of life, all political parties, some of who probably have never been to New York City before, have said, "What can I do to help? How can I help somebody whose lives have been adversely affected by the evil ones?" And behind me sits the answer, one beautiful, well-manufactured truck, made by an entrepreneur in Louisiana who asked his people to work overtime, and they did, to deliver it here today. I know I speak on behalf of all Americans: Thank you for what you're doing.

No, they roused a mighty nation. They roused a mighty nation, and we will not be stopped. We're not going to be stopped overseas, and we're sure not going to be stopped here at home.

I hope every family here and all the folks who volunteered to make this happen have a wonderful holiday season. May God bless your families, and may God continue to bless America. Thank you for coming.

NOTE: The President spoke at 1:50 p.m. on the South Lawn at the White House. In his remarks, he referred to Gov. M.J. "Mike" Foster, Jr., of Louisiana, and his wife, Alice; Ronald Goldman, who initiated the idea of the "Spirit of Louisiana"; Usama bin Laden, leader of the Al Qaida terrorist organization; and Chris Ferrara, president and chief executive officer, Ferrara Fire Apparatus, Inc.

Message to the Congress Transmitting a Report on Aeronautics and Space Activities

December 19, 2001

To the Congress of the United States:

I am pleased to transmit this report on the Nation's achievements in aeronautics and space during Fiscal Year (FY) 2000, as required under section 206 of the National Aeronautics and Space Act of 1958, as amended (42 U.S.C. 2476). Aeronautics and space activities involved 11 contributing departments and agencies of the Federal Government, and the results of their ongoing research and development affect the Nation in many ways.

A wide variety of aeronautics and space developments took place during FY 2000. The National Aeronautics and Space Administration (NASA) successfully completed four Space shuttle flights. In terms of robotic space flights, there were 24 U.S. expendable launch vehicle launches in FY

2000. Five of these launches were NASA-managed missions, nine were Department of Defense (DoD)-managed missions, and eight were FAA-licensed commercial launches. In addition, NASA flew one payload as a secondary payload on one of the FAA-licensed commercial launches. This year, two new launch vehicles debuted: the Lockheed Martin Atlas IIIA and the Boeing Delta III, each serving as transition vehicles leading the way for the new generation of evolved expendable launch vehicles.

Scientists also made some dramatic new discoveries in various space-related fields such as space science, Earth science and remote sensing, and life and microgravity science. In aerospace, achievements included the demonstration of technologies that will reduce the environmental impact

of aircraft operations, reinvigorate the general aviation industry, improve the safety and efficiency of U.S. commercial airlines and air traffic control system, and reduce the future cost of access to space.

The United States also entered into many new agreements for cooperation with its international partners around the world in many areas of space activity.

Thus, FY 2000 was a very successful one for U.S. aeronautics and space programs. Efforts in these areas have contributed sig-

nificantly to the Nation's scientific and technical knowledge, international cooperation, a healthier environment, and a more competitive economy.

GEORGE W. BUSH

The White House,
December 19, 2001.

NOTE: This message was released by the Office of the Press Secretary on December 20.

Remarks to Martha's Table Leaders and Volunteers *December 20, 2001*

Thank you all. It must be hard to describe how to cause people to love one another, which is precisely why this program is so meaningful and so real to people. I'm here because I want the American people to understand the greatest gift they can give this holiday season is to programs such as Martha's Table.

We're such a generous nation, and after September the 11th, people gave very generously to those whose lives were affected as a result of the terrorist activity. But unfortunately, contributions to organizations, community-based organizations all aimed at helping brothers and sisters in need, have fallen off.

And so my wish for Christmas, for the holiday season, is for our country to be at peace, to be protected, that our men and women overseas are protected, but that the great generosity of Americans come to the surface again to help people whose sole purpose is to say, "What can I do to help somebody? What can I do? How can I live the Biblical admonition to treat somebody just like I'd like to be treated myself?"

I want to thank the leadership of this great program. It's a pretty strong leadership. First of all, they got my mother to come—[laughter]—who said, "When you

get up there, you make sure you go by Martha's Table." I said, "Yes, ma'am." [Laughter] And by the way, I'm going to see her Saturday, and I look forward to telling her you're doing great. I got to see the expansion, the new addition to this program. And I want to congratulate the members of the board and the hard workers who've gone out to raise the money to see that the expansion came to be. I want to thank all the volunteers who are here.

You know, part of my vision for a better America is that our country understands the power of faith-based and community-based organizations—and government should do everything it can to facilitate their expansion all around the country—that a lot of times faith can do things that others can't. And while governments should never promote a particular religion, governments should not fear faith and should welcome those programs based upon faith, because government couldn't possibly duplicate what goes on inside this building. There is no way that our Government could mandate love. I used to tell people, I wish I could make people love one another, and I'd sign the bill, but that's not the way life works. What happens is, dedicated citizens decide they're going to do something
